

ART & DESIGN YEAR 10 SUMMER HOMEWORK

Working on your art coursework over the summer holidays is an important way to develop your ideas and potentially raise your grade. Explore the tasks below, which should be possible using the resources you already have. If you wish to borrow any equipment, please ask.

1. Landscape photography

Take a range of landscape photography, considering texture. This should include close-ups and those with foreground, middle ground and background as shown below. They could be rural or urban landscapes. You could show where you live or any places you visit over the summer.

2. Landscape sketchbook

Using the small sketchbook you have been given, document any interesting or unusual landscapes. You can use any media including pencil, pen or paint. You could also make notes to describe the views and describe your emotions looking at the landscapes, like a diary entry. It will form part of your coursework.
